WHAT IS WSMA?

• We’re a student-run, non-profit organization dedicated to promoting the beauty and applications of math that are often neglected in school.

• Our goal is simple: to showcase how doing math and solving problems can be fun and useful, and to empower students (and math clubs) to solve many types of problems.
EVENTS
MATH BOWL

• Math bowl is an annual competition hosted by WSMA

• It’s not like most math competitions you’ve been to. The Math Bowl is setup in a bracket format, and you compete head to head with other teams!

• Both middle school and high school students can attend.
MATH MANIA

• We've partnered with Microsoft to host Math Mania, an interactive math seminar. It will take place from 12:00PM to 4:00PM on April 26th, and will include displays about the applications of mathematics in areas such as sports, nature, movies, and much more.

• In addition, there will be a scavenger hunt around Bellevue Square that will include many prizes and fun math problems! Admission is free and people of all ages are welcome!
WSMA WORKSHOP

• On a monthly basis during the school year, WSMA hosts a workshop at a local library or community location in the King County area.

• At the expos, students learn about math topics that aren’t typically covered in school by working on puzzles, competing against each other, playing games, and not to mention getting candy.
WHY LEARN MATH

• Why Learn Math is a competition that asks students to examine why learning math is important in modern society.

• Each year the Washington Student Math Association proposes a theme relating to math applications in the real world. A panel of judges chooses the top student submissions that best illustrate that year's theme in a creative and convincing way. The winners will receive a generous sum of prize money.

• Submissions can be essays or videos, and the top submissions are featured on the WSMA website.
